

**2nd International Conference on Utility Management & Safety
Technical Visit to Ngong Ping 360
(9 March 2011)**

A 1-day technical visit in Hong Kong Ngong Ping 360 and Ngong Ping Sewage Treatment Works was organized to enhance participants' understandings and knowledge of the application of engineering, underground utility management and safety knowledge.

The technical visit was jointly organized by DPDC, HKARMS, HKIE and supporting organizations of 2nd ICUMAS.

Technical Visits

The destination of this visit was the Hong Kong Ngong Ping. This visit started by a visit to NP360 Cable Car System which gave a brief introduction to participants about the NP360 Cable Car Operating System. After that, participants enjoyed the NP360 Cable Ride.

Before having lunch at Po Lin Monastery Vegetarian, participants visited the Ngong Ping Sewage Treatment Works which a representative from there gave the participants a talk on the details of sewage treatment process and the underlying principles. Participants then travelled once again by cable car from Ngong Ping to Tung Chung before the visit ended.

Speaker from Ngong Ping Sewage Treatment Works

Without the support of our supporting organizations, this technical visit is successfully held. We truly wish that each participant found the visit inspiring and we look forward to seeing you all again in our coming activities.
